

Blasting of Heavy Rocks in Siripuram

Date: 13.06.2023

The news that the heavy rocks in cellars of the buildings under construction in the site of Baptist Church of Northern Circars (CBCNC) in Siripuram area are going to be blasted is causing lot of tension among the residents. In fact the Siripuram area is full of apartments and commercial establishments and the roads are always full of vehicular traffic. Bombings in such populous and trafficated areas will have drastic impact on the residents and the passersby. The vibrations emanating from the bombings will most likely cause breaks to the nearby buildings and impact the foundations as well. The bombings may lead to some environmental issues also. The sounds and vibrations due to the bombings are likely to harm the aged and the patients residing in the nearby buildings. The stones and the dust flown by the bombings may likely endanger the lives of the residents and the passersby.

We, therefore, urge upon the Honourable Mayor, the Commissioner and other responsible officials of GVMC to take appropriate actions to avoid harmful dangers due to the heavy bombings on the people.

'Blasting of heavy rocks in Siripuram a nuisance'

The Hindu Bureau
VISAKHAPATNAM

Visakhapatnam Apartment Residents' Welfare Association (VARWA) and Greater Visakha Resident Colony Associations' Federation on Tuesday jointly urged Mayor Golagani Hari Venkata Kumari and other authorities to take appropriate action to avoid the dangers and nuisance due to the blasting of heavy rocks at the building construction site near the Baptist Church of Northern Circars in Siripuram.

The association secretary B.B. Ganesh and federation secretary Pitta Na-
